

DRIVEN BY INNOVATION, QUALITY AND RESULTS

Founded by an aesthetician and formulated by a plastic surgeon, IMAGE Skincare is used and recommended by more than 50,000 professionals across 60 countries worldwide

The professional, clinical skincare brand IMAGE Skincare features proven and effective formulas, powered by dermatologist-recommended ingredients that deliver evidence-based results. When it comes to integrity, there is no compromise—the dermatologically tested products are formulated without parabens, phthalates, mineral oils, artificial fragrances, or synthetic dyes. When founder Janna Ronert started IMAGE Skincare in 2003, the brand represented something that, even as an aesthetician, she could not find on the market: clean, uncomplicated skincare that delivered real results.

Starting with the hydrating vitamin C serum she perfected in her own kitchen, Ronert's determination to do things differently has led to the creation of more than 100 products and 11 collections, all underlined by the powerful proof of clinical results.

The entrepreneur is now IMAGE Skincare's Chairwoman, inspiring women worldwide with her passion, dynamism, and leadership. In 2012, she was honoured with Ernst & Young's Entrepreneur of the Year Award for distribution, and is recognised among the top 200 CEOs in the USA.

Dr Marc Ronert, European board-certified Plastic Surgeon and Co-Founder, has been instrumental in developing the brand's scientifically advanced formulations. His book, *Age Later: Look Seven Years Younger in Just Seven Weeks*, encapsulates the unique approach to skincare that has propelled IMAGE

DAILY PREVENTION

This revolutionary sun care line offers more than just protection from sun damage. With a proprietary delivery system and extensive efficacy testing, DAILY PREVENTION products boost hydration, improve skin resilience, and guard against the early signs of ageing.

Skincare to the forefront of the industry. IMAGE Skincare UK KOL Dr Pradnya Apté, comments "I am delighted and honoured to be appointed KOL for IMAGE skincare. I have been using the brand since 2014 and have loved seeing it evolve and grow into the skincare industry powerhouse it is today. "I have seen consistently excellent results with my patients for a variety of skin concerns, and my returning patient base—not only to buy the products but also to have their award-winning peels—has seen my aesthetic clinic grow. I love the science behind the products, as well as the clinical studies attached to them. "There is a wonderful ethical philosophy behind the brand which makes it coveted

in my eyes, especially with the Care for Skin Foundation established by Dr Marc Ronert and the charity work they do. It is all about putting patients and people first." The brand's people-first philosophy has propelled it to the number one professional skincare brand in the US spa and salon category, as tracked by Kline & Co, for the third year in a row. IMAGE Skincare offers a comprehensive range of retail home care products and professional treatments, designed to address a variety of skin concerns.

VITAL C

The best-selling collection powered by multiple forms of vitamin C and antioxidants, VITAL C is designed to nourish and brighten skin, combating dehydration and dullness for a radiant, even-toned complexion. One VITAL C product is sold every two minutes worldwide!

IMAGE MD

High-performance, doctor-developed skincare with advanced technology for youthful-looking skin. Utilising cutting-edge technology, IMAGE MD products support the skin's natural defence mechanisms, protect against environmental damage, and correct nutritional imbalances within the skin.

The MAX

Clinical advancements for younger-looking skin, featuring plant cell extracts and peptides for maximum correction, prevention and nutrition. Ideal for those with sensitive skin or who are intolerant to traditional anti-ageing ingredients like AHAs and retinol. The MAX collection targets fine lines, wrinkles, and loss of volume, working synergistically with advanced treatments including lasers and injectables.

BIOME+

A collection focused on skin barrier defence, BIOME+ combines clinical adaptogens, plant extracts, and squalane to hydrate, brighten and strengthen the skin's moisture barrier.

I have seen consistently excellent results with my patients for a variety of skin concerns, and my returning patient base

Dr Pradnya Apté, IMAGE Skincare UK KOL

PROFESSIONAL-ONLY

Products with customisable, aloe-based gel peels, advanced peels and treatment enhancers. Enzymatic peels utilise gently exfoliating fruit-based enzymes to dissolve dead skin cells, support skin cell renewal and soften skin texture with minimal irritation. The popular I PEEL signature facelift combines vitamin C, alpha hydroxy acids, and gentle but highly effective enzymes to speed up cellular renewal and brighten, tighten and lighten skin in just one treatment. Perfect for all skin types, especially dry or sensitive skin.
